CAREER OBJECTIVE

To adapt myself into a good platform and to execute my skills and knowledge in the form of hard work to put forth a successful full output for the uplift of the company.

WORK EXPERIENCE:

SOFTWARE DEVELOPER

BloodOxy Scans and Labs

November 2020 - February 2023

- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Planned and developed interfaces that simplified overall management and offered ease of use.
- Gathered and defined customer requirements to develop clear specifications for project plans.
- Designed, developed, modified and debugged programs.

TOOLS:

Spring boot Version: 3.9.6

DATABASE:

MySQL Workbench 6.3

DESIGNING

HTML 5 and CSS 3

Role: The primary role is to learn the codebase, attend design meetings, write basic code, fix bugs, and assist the development in all design-related tasks.

ASSOCIATE SOFTWARE DEVELOPER

Zappyworks

March 2023 - Present

- Collaborate with the User Experience (UX) team/designer
- Develop, record and maintain application
- Gathered and defined customer requirements to develop clear specifications for project plans.
- Designed, developed, modified and debugged programs.
- Designed landing pages using figma

TOOLS:

Zoho Sites, Zoho Creator

DATABASE:

Zoho Books

DESIGNING

HTML 5 and CSS 3, Figma

PROJECTS:

Person's Involved in project: 3 Members.

1) **Project Title:** Website Development

Project Status: Completed.

Create and Code internet sites and web pages, many of which combine text with sounds, pictures, graphics, and video clips.

Creating the design and layout of a website or web pages.

It can mean working on a brand-new website or updating an already existing page.

Tools Used: HTML5, CSS, JavaScript, Java, MySQL, Photoshop, Illustrator.

Role: Design the webpages and layout for webpages, updating brand-new or already existing page. Creating entities and database design, programming the backend flow for the project and after implementation testing the flow of the work.

2) **Project Title:** HRMS (Human Resources Management System)

Project Status: Ongoing.

Responsible for creating the design and layout of a website or web pages.

Testing and improving the design of the website. Monitoring, and evaluating system performance, and designing and implementing new programs and features.

Tools Used: HTML5, CSS, JavaScript, MySQL, Java.

Role: Design the layout for HRMS. Creating entities and database design, programming the backend flow for the project and after implementation testing the flow of the work.

3) **Project Title:** Machine Interface

Project Status: Completed.

Responsible for creating the design and layout of a Machine interface.

Responsible for creating database design.

Testing and improving the design of the website. Monitoring, and evaluating system performance, and designing and implementing new programs and features.

Web API

Tools Used: HTML5, CSS, JavaScript, MySQL, Java.

Role: Design the layout for Machine interface. Creating entities and database design, programming the backend flow for the project and after implementation testing the flow of the work.

PROJECT EXPERIENCE IN COLLEGE:

Person's Involved in project: 2 Members.

1) **Project Title:** Student Credits and Mark Processing System

- ✓ Creating application in PHP.
- ✓ Supporting client team to implement feature.
- ✓ Debugging issues.

Tools: PHP, Html, MYSQL

Description: The Student Credit's and Mark Processing system has the capacity to store the details of our college. Using this work, we can easily manage all records.

Role: Worked on key aspects of the app such as Programming Guide, Back stack management, Data management, Concurrent server request handling.

2) **Product Title:** Online Shortest Path.

- ✓ Find Location, Distance calculation, Mid-Value finder.
- ✓ Collect N-Number path, Highlight Traffic Signals, Implementing Dijkstra's.
- ✓ Creating shortest path according to user location.
- ✓ Maintaining database and debugging issues

Tools: C#.NET, Microsoft SQL Server 2005.

Description: In an Online shortest path, at the points where a link is failed, a recourse is available so that the user can take another path toward the destination. This is an intuitive approach for modelling transit networks where path reliability is determined by link failure.

TECHNICAL SKILLS		ADDITIONAL SKILLS
Programming:	Java	Adobe Photoshop
Database:	MySQL	Adobe Illustrator, Adobe XD
Designing:	HTML5, CSS, JavaScript	Adobe Flash, Figma

LICENSES & CERTIFICATIONS

- 1) **Certificate Provider:** FreeCodeCamp
Course: Responsive Web Design (**Valid:** Apr 2021 Does not expire)
Certificate Link: <https://www.freecodecamp.org/certification/hareesh/responsive-web-design>

- 2) **Certificate Provider:** FreeCodeCamp
Course: JavaScript Algorithms and Data Structures (**Valid:** Aug 2021 Does not expire)
Certificate Link: <https://www.freecodecamp.org/certification/hareesh/javascript-algorithms-and-data-structures>

- 3) **Certificate Provider:** Codecademy
Course: Learn Java (**Valid:** Oct 2017 Does not expire)
Certificate Link: <https://www.codecademy.com/profiles/Hareeshmano0796/certificates/d3f89367b558583e361640f778191345>

- 4) **Certificate Provider:** Udemy
Course: Maya for Beginners: Complete Guide to 3D Animation in Maya (**Valid:** Nov 2021 Does not expire)
